

Texas State Technical College Waco Nuclear Scholarship Program

Executive Summary:

This funding would support approximately twenty-five (25) one-year scholarships with students enrolling in training programs which will lead to employment in the nuclear field. The request covers student travel for field trips to nuclear industry sites and related conferences. Over 80% of students at TSTC Waco receive financial aid, and 45% are designated “economically disadvantaged.” The available scholarships will be directed to students with demonstrated academic promise and significant financial need who are training for careers in the nuclear industry. Without this scholarship support, many of these students would not be able to pursue their training.
